

### **Program Description:**

In this program, we will review common etiologies and risk factors of peri-implant diseases. We will focus on evaluating inflammatory implant disease in order to identify site and case specific causes. We will discuss treatment sequencing and expected outcomes while focusing on etiology specific therapy.

### **Program Objectives:**

At the completion of the program, participants should be able to:

- Diagnosis basic inflammatory implant disease.
- Describe common etiologies of peri-implant inflammatory disease.
- Identify risk factors for inflammatory implant disease.
- Identify iatrogenic concerns for peri-implant disease.
- Understand case specific peri-implant therapy and expected outcomes.

### **Jason M. Naud, DDS, MS**

Dr. Naud attended the University of Washington for both his undergraduate and dental school training. He followed this with his residency in Periodontics at the Mayo Clinic in Rochester, MN. Dr. Naud successfully challenged the American Board of Periodontology and is Board Certified in Periodontology and Dental Implant Surgery. Dr. Naud also actively participates in research regarding Gum Grafting techniques and material development. He lectures on Gingival Recession, Implant Surgery and Restoration Planning, Implant Complications and Management, and Periodontal Therapy. He has published two peer reviewed scientific articles and is an advisory consultant for surgical material development. Dr. Naud has a private practice in Duluth, MN.
