MENTAL HEALTH STRATEGIES FOR OURSELVES, OUR COLLEAGUES & OUR PATIENTS (1 CE) • Max of 60 Participants • Presented by: Mary Wolf • 3:00 p.m. – 4:00 p.m.

Course Description:

As a dental professional, mental health has become a paramount issue in order to prevent burnout in ourselves and care for team members and patients. Sometimes we need to put down the cape and invest time and energy into ourselves and our priorities. Other times, we need to focus on a colleague who is struggling. And every once in a while, we notice that a patient needs some help with emotional health. Learn how everyone can promote wellbeing at work.

Learning Outcomes:

- Utilize the Mental Health Continuum to identify symptoms and strategies more proactively.
- Learn how to help a colleague who is struggling.
- Create wellbeing practices to implement in your clinic.

DENTAL EQUIPMENT MAINTENANCE – BEING PROACTIVE, NOT REACTIVE (Non CE Offering) Max of 30 Participants • Sponsored by: Henry Schein Dental Presented By: David Stokka, Adam Watterson & Jarod Wilson 3:30 p.m. – 4:30 p.m. & 5:00 p.m. – 6:00 p.m.

Protecting the longevity of high-tech equipment while prioritizing compliance and safety measures is critical in a dental practice. Join us for an engaging and insightful course tailored to dental professionals looking to enhance their understanding and stay compliant on properly caring for dental equipment with practical insights and strategies on dental office maintenance.

TO PULL OR NOT TO PULL

(3 CE's) • Sponsored by: ND Dental Foundation • Presented By: Dr. Daniel Pompa • 4:00 p.m. – 7:00 p.m.

Course Description:

Advancements in delivering periapical surgery have resulted in success rates that can be equivalent to implant replacement when certain guidelines are adhered to. Periapical surgery as an adjunct to endodontic treatment is a proven approach. With the introduction of new surgical techniques and a systematic method to the diagnosis and treatment of compromised teeth, the clinician should be able to more accurately determine the long term prognosis for these treatment options. Evaluate treatment options with an evidence-based approach when a tooth is ailing or failing. This course will describe the indications and contraindications for performing or referring a patient for apical surgery. With a specific 7 step workup, including a correct history, radiographic and clinical evaluation, the decision to perform an apicoectomy will be weighed against further evaluation, a re treatment option, or extraction and replacement with an implant (immediate or delayed). As a result, a decision is more accurately made as to whether an implant or a fixed bridge (fixed partial prosthesis), a removable prosthesis (fixed or transitional temporary prosthesis), or other options would be the final treatment plan discussed with the patient.

Learning Outcomes:

- Learn the radiographic technique to use when evaluating a tooth for a fracture.
- List the 7 step work-up, consisting of procedures and tests that should be used when performing or referring a patient for an apicoectomy.
- Understand the principles of guided tissue regeneration, and know the indications and contraindications for its use.
- Recognize how the location of a sinus tract can be a key critical diagnostic indicator for the final prognosis.
- Identify the signs to differentiate between an Endo/Perio vs. Perio/Endo lesions and understand the difference as it relates to the final prognosis.

BASIC LIFE SUPPORT CPR/AED

(3 CE's) Max of 24 Participants • Sponsored by: PULSE Medical Training • Presented By: Lindsey Ahlschlager & Angie Hintz • 4:00 p.m. – 7:00 p.m.

Course Description:

The AHA's BLS course trains participants to promptly recognize several life-threatening emergencies, give high-quality chest compressions, deliver appropriate ventilations and provide early use of an AED.

Learning Outcomes:

- High-quality CPR for adults, children, and infants
- The AHA Chain of Survival, specifically the BLS components
- Important early use of an AED
- Effective ventilations using a barrier device
- Importance of teams in multi rescuer resuscitation and performance as an effective team member during multi rescuer CPR
- Relief of foreign-body airway obstruction (choking) for adults and infants

PREVENTING BURNOUT AND PROMOTING WELLBEING IN YOUR CLINIC

(1 CE) Max of 60 Participants • Presented by: Mary Wolf • 6:30 p.m. – 7:30 p.m.

The burnout crisis forces us to study the root causes so that we can develop upstream approaches to preventing burnout and creating cultures of wellbeing.

Learning Outcomes:

- Identify burnout symptoms based on research findings.
- Create wellbeing practices to implement in your clinic from the model of the US Surgeon General's framework on Workplace Mental Health and Wellbeing.
- Learn resources to help with mental health and wellbeing

Jack Pfister, DDS - Lecture Series

STATE GOVERNANCE & RULEMAKING 101

(1 CE) (Max of 60 Participants) • Sponsored by: North Dakota Board of Dental Examiners Presented By: David Schaibley, Esq. • 4:30 p.m. – 5:30 p.m.

Course Description:

This session provides an introduction and overview of the North Dakota State Board of Dental Examiners (Board)—the state governmental entity charged with the responsibility of regulating the practice of dentistry. Included will be a discussion of Board members, appointments and terms of office, laws that govern the dental profession, and the Board's roles, duties, obligations, and limitations. Specific attention will be paid to the complaints and disciplinary process, the Board's rulemaking responsibilities, and the Board's recent experience asking the Legislative Administrative Rules Committee to adopt changes to some of the regulatory laws that apply to dentistry.

Learning Outcomes:

Attendees will gain an understanding of the Board's:

- Relationship with and oversight by the Office of the Governor and State Legislative Assembly.
- Duties, roles, responsibilities, obligations, and limitations.
- Relationships with and differences between the Board and other governmental and non-governmental entities.
- Regulation of the practice of dentistry and licensees, with a focus on the applicable statutes, rules, regulations, and policies.
- Complaint and disciplinary processes.
- Rulemaking, including the overall process and the roles of the Board, its licensees, stakeholders, and the Legislative Assembly.
- Recent rulemaking efforts, including a discussion of possible decisions made by the Legislative Administrative Rules Committee at its September 4, 2024, meeting and the Board's proposed modifications to ND Admin Code chapter 20.

Friday, September 13, 2024

ACTIONS & ALGORITHMS FOR MEDICAL EMERGENCIES: HOW TO SAVE A LIFE (INCLUDING YOUR OWN) (6 CE's) • Presented by: Dr. Daniel Pompa • 8:15 a.m. – 4:45 p.m.

Course Description:

There are more medically compromised patients coming to our offices than ever before. Acquire "up to the minute" actions for dealing with a medical emergency while challenging preconceived or outdated ideas. Daniel Pompa, DDS - Oral and Maxillofacial Surgeon, ADA Consultant and Seminar Series Speaker - discusses the prevention, preparation, recognition and management of medical emergencies. Delivered in an interactive, high energy, multi-media presentation frequently described by attendees as "highly informative," "engaging," and "exceptional." A step-by-step medical approach using basic physical diagnostic methods is reviewed, giving the attendee a clear understanding of these medical findings.

We will explore the "Conversational History" and how it will uncover medical issues not revealed by the standard health history form. Additionally, the participant will learn simple, non-invasive critical tests that can reduce overall risks. We clearly delineate indications for emergency drug use and proper dosages, as well as demonstrate how to assemble and maintain an ideal emergency drug kit. The newest techniques for drug administration will be shown for participants to hone their skills utilizing simulation models and real drugs. Dr. Pompa may incorporate live demonstrations to enhance the learning experience depending on the venue format.

Learning Outcomes:

- Discover three simple chair-side, non-invasive tests to help avoid an emergency.
- Recognize the most frequent life threatening emergencies and know when and why they occur.
- Review a systematic approach to treat the most common life-threatening scenarios.
- Learn how to develop a plan for the office team when dealing with a crisis event.
- Determine when to administer the essential "Top 10" emergency drugs.
- Understand legal and moral obligations presented by medical emergencies.

IMPLANTS: FROM TREATMENT PLANNING TO MAINTENANCE AND COMPLICATIONS (6 CE's) • Sponsored by: ZimVie • Presented By Dr. Jason Naud • 8:15 a.m. – 4:45 p.m.

Course Description:

In this program, we will review common etiologies and risk factors of peri-implant diseases. We will focus on evaluating inflammatory implant disease in order to identify site and case specific causes. We will discuss treatment sequencing and expected outcomes while focusing on etiology specific therapy.

Learning Outcomes:

- At the completion of the program, participants should be able to:
- Diagnose basic inflammatory implant disease.
- Describe common etiologies of peri-implant disease.
- Identify risk factors for inflammatory implant disease.
- Identify iatrogenic concerns for peri-implant disease.
- Understand case specific peri-implant therapy and expected outcomes.
