

2025 NDDA Annual Session

North Dakota
DENTAL ASSOCIATION

September 18 – 19, 2025

Delta Hotels by Marriot

1635 42nd Street SW • Fargo, ND 58103

Schedule of Events | Annual Session

THURSDAY, SEPTEMBER 18

7:30 a.m. – 9:00 a.m. **NDDA Board of Trustees Meeting** - Sonata II

9:00 a.m. – 1:00 p.m. **Exhibitors to set up booths** - Crystal I & II

11:00 a.m. – 2:00 p.m. **Kingpinz – Where Entertainment Strikes Gold**

2:00 p.m. – 8:00 p.m. **Exhibit Hall Open** – Crystal I & II

2:00 p.m. – 6:30 p.m. **SIM-ND: Mobile Anesthesia Simulation for Dental Sedation Providers** (Sponsored by: UND School of Medicine) (1.5 CE's) Available Sessions (Max of 4 individuals per session)
2:00 p.m. – 3:30 p.m. | 3:30 p.m. – 5:00 p.m. | 5:00 p.m. – 6:30 p.m.

3:00 p.m. – 4:00 p.m. **Supporting Dental Professionals: An Introduction to the NDPHP** (Sponsored by ND Professional Health Program) (1 CE) Maggie Seamands, RN - Brahms

3:00 p.m. – 5:00 p.m. **Improved Patient Care Through Lawsuit Protection & Prevention** (Sponsored by: American Society for Asset Protection) (Max of 48) (No CE) – Larry Oxenham – Etude

4:00 p.m. – 5:00 p.m. **Medicaid “What’s New”** (Sponsored by: North Dakota Human Services) (1 CE) – Rachael Buchwitz, RN – Mozart I & II

4:00 p.m. – 8:00 p.m. **A Hands-on Veneer Workshop: The Essence of Smile Design** (Max. of 36) (4 CE's) – Dr. Marc Geissberger - Overture

5:00 p.m. – 7:00 p.m. **Introduction to CBCT** (Sponsored by: Bisnett Oral Radiology) (2 CE's) – Dr. Derrick Bisnett – Brahms

5:00 p.m. – 7:00 p.m. **Don't Let Practicing Dentistry Break Your Bod!** (Sponsored by: Lumadent + Premier & Crest) (2 CE's) – Stephanie Botts BSDH, RDH, CEAS – Bach

6:00 p.m. – 8:00 p.m. **House of Delegates** – Etudes

7:00 p.m. – 12:00 a.m. **President's Mixer** – Casino Nights - Crystal III

SIM-ND: MOBILE ANESTHESIA SIMULATION FOR DENTAL SEDATION PROVIDERS (1.5 CE'S)

(Sponsored by: UND School of Medicine) Available Sessions (Max of 4 individuals per session)

2:00 p.m. – 3:30 p.m. | 3:30 p.m. – 5:00 p.m. | 5:00 p.m. – 6:30 p.m.

Course Description:

Since 2013, SIM-ND has been bringing hands-on training to healthcare workers throughout North Dakota, from rural paramedics and firefighters to national guardsmen, medical residents, and physicians. This program, Simulation In Motion - North Dakota (SIM-ND), is a statewide, mobile education system using high fidelity human patient simulators to train pre-hospital and hospital personnel. The program does so using four 44-foot mobile simulation lab trucks that offer two separate simulation spaces and provide versatile and unique learning opportunities. With the help of high-fidelity human simulators, SIM-ND can immerse learners in a safe but realistic learning environment.

What Is It?

SIM-ND delivers mobile, simulation-based moderate / deep sedation and emergency training to dental teams across North Dakota.

Who Should Participate:

General dentists, OMS, sedation assistants, and office emergency teams.

Delivered in SIM-ND Mobile Units:

Simulated operator & emergency bay, high-fidelity mannequins, airway management tools, video debriefing.

Core Topics:

Sedation safety, complication management, airway rescue, emergency drills, ACLS/BLS reinforcement.

Why It Matters:

✓ Earn CE ✓ Practice real-world emergencies ✓ Reduce risk ✓ Meet ND state board expectations.

SUPPORTING DENTAL PROFESSIONALS: AN INTRODUCTION TO THE NDPHP (1CE)

(Sponsored by ND Professional Health Program) • Presented By: Maggie Seamands, RN

3:00p.m. - 4:00p.m.

Course Description:

This course provides North Dakota dental professionals with a comprehensive overview of mental health and substance use disorders within the dental field. Participants will explore the unique stressors and risk factors that contribute to these challenges, as well as the stigma that often prevents individuals from seeking help. The course introduces the North Dakota Professional Health Program (NDPHP), a confidential and supportive resource designed to assist healthcare professionals in addressing mental health and substance use concerns while maintaining public safety. Through education, case examples, and discussion, attendees will gain practical tools to recognize signs of distress, support colleagues, and engage with NDPHP services proactively.

Course Outline:

1. Raise Awareness of Mental Health and Substance Use Challenges in Dentistry

1. Highlight the elevated risk of mental health issues and substance use disorders among dentists, including stress, burnout, and isolation.
2. Share national and North Dakota-specific data, including the fact that dentists rank among the top professions for suicide risk

2. Destigmatize Help-Seeking Behavior

1. Address the cultural and professional barriers that prevent dental professionals from seeking help.
2. Emphasize that seeking support is a sign of strength and professionalism, not weakness.

3. Introduce the North Dakota Professional Health Program (NDPHP)

1. Explain NDPHP's mission to support healthcare professionals with mental health or substance use issues while protecting public safety
2. Describe the confidential, non-punitive nature of the program and how it helps professionals return to safe practice.

4. Outline the Support Services Offered by NDPHP

1. Detail services such as education, monitoring, advocacy, and referrals to treatment.
2. Explain how NDPHP collaborates with employers, licensing boards, and treatment providers to support recovery

5. Encourage Proactive Engagement and Peer Support

1. Provide guidance on how dentists can refer themselves or colleagues to NDPHP.
2. Promote a culture of peer support and early intervention within the dental community.

IMPROVED PATIENT CARE THROUGH LAWSUIT PROTECTION & PREVENTION (MAX OF 48) (NO CE)

(Sponsored by: American Society for Asset Protection) • Presented By: Larry Oxenham

3:00 p.m. – 5:00 p.m.

Course Description:

Is your financial house in order? Discover the tools you can use to become invincible to lawsuits, save thousands in taxes, and achieve financial peace of mind. By the end of the presentation, you will know how to: 1) Protect 100% of your assets from lawsuits. You will learn how to make yourself so unattractive to a plaintiff attorney that they will never pursue a lawsuit against you. 2) Save thousands of dollars each year in taxes. You will learn five tax reduction strategies most dentists fail to utilize, which could save you more than \$10,000 each year in taxes. 3) Avoid probate and eliminate all estate taxes. You will be taken through a checklist of items that are important to every estate and business succession plan. You will learn what you should be doing now to prepare for successful business and estate succession.

Learning Outcomes:

- Maintain focus on improved patient care, rather than lawsuit defense.
- Structure assets for lawsuit protection and prevention.
- Minimize taxes.
- Create a successful estate and business succession plan.

MEDICAID "WHAT'S NEW" (1 CE)

(Sponsored by: North Dakota Human Services) Presented By: Rachael Buchwitz, RN

4:00 p.m. – 5:00 p.m.

Course Description:

- **Dental Manual Redesign:** A look at the ongoing redesign of the Dental Manual, aimed at improving clarity, usability, and accessibility for providers.
- **New Procedure Code Lookup Tool:** An introduction to our new digital tool that simplifies finding and understanding dental procedure codes.
- **Ensure Kids Now Survey:** Updates on the annual survey, which will transition to an electronic format this fall to streamline participation and data collection.
- **Recent Policy Changes:** A brief overview of several important policy updates that impact dental providers.

Jack Pfister, DDS - Lecture Series

A HANDS-ON VENEER WORKSHOP: THE ESSENCE OF SMILE DESIGN - (MAX. OF 36) (4 CE'S)

Presented By: Dr. Marc Geissberger

4:00 p.m. - 8:00 p.m.

Course Description:

The focus and awareness of esthetic dentistry has never been greater. Today's patients have heightened expectations and desires. Understanding the desires and meeting patient's demands has become increasingly complex and challenging. Case design and case presentation will be an integral portion of the course. This course will review the principles of facial esthetics, smile design and provide practitioners with the tools necessary to deliver remarkably beautiful results. Participants will apply esthetic principles and philosophies to design an esthetic result with a variety of different techniques. Anterior veneer and crown design will be reviewed. Provisional restorations and bonding techniques will be explored. Final delivery and finishing will be discussed and practiced. During the hand-on portion of the program clinicians will:

Learning Outcomes:

- Learn how to fabricate and deliver a smile design and simulation.
 - Learn and practice various veneer preparations and when to use them clinically.
 - Practice provisional fabrication and placement techniques.
 - Learn how to adjust and bond final restorations using state-of-the-art materials.
-

INTRODUCTION TO CBCT - (2 CE'S)

(Sponsored by: Bisnett Oral Radiology) • Presented By: Dr. Derrick Bisnett

5:00 p.m. - 7:00 p.m.

Course Description:

In this two-hour lecture, Derrick will cover the basics of imaging, techniques, and common questions regarding CBCT. He will explore the daily use of CBCT in dental practice, providing insights into the fundamental technology behind this imaging method. The first hour will focus on imaging basics, including common viewing techniques and practical tips to enhance your confidence and proficiency with CBCT. In the second hour, Derrick will delve into anatomical structures, common imaging mistakes, and potential pitfalls, ensuring that you can avoid these issues and maximize the benefits of CBCT in your practice.

DON'T LET PRACTICING DENTISTRY BREAK YOUR BOD! - (2 CE'S)

(Sponsored by: Lumadent + Premier & Crest) • Presented By: Stephanie Botts BSDH, RDH, CEAS

5:00 p.m. - 7:00 p.m.

Course Description:

Knowing and practicing ergonomics is crucial for anyone working in dentistry. We all know we should be sitting up straight and protecting our bodies while working, but how do we do that when working on patients? This course will offer practical guidance on incorporating basic ergonomic principles into the operator. Patient positioning and operator positioning are crucial elements to focus on while in the operator, and this course will offer a deep dive into both topics. It will also cover the differences in operator design with the unique benefits and challenges specific to each. Finally, we will learn how to reduce our stress and risk of injury with activities such as breathing, exercise, and diet. Practicing dentistry is tough, but it does not have to break your bod!

Learning Outcomes:

- Understand foundational ergonomic strategies and how to achieve proper ergonomics in the operator.
- Identify proper operator positioning depending on the task or treatment area.
- Utilize different patient positions to assist in ergonomic dental practice.
- Compare and contrast different operator layouts.
- Comprehend different strategies to downregulate the nervous system and reduce the risk of future injury.

PERI-IMPLANT DISEASE & IMPLANT MAINTENANCE: ETIOLOGIES & RISK FACTORS - (6 CE'S)

(Sponsored by: ZimVie) • Presented By: Dr. Jason Naud

8:15 a.m. – 4:45 p.m.

Course description:

This course explores the current understanding of peri-implant diseases, including peri-implant mucositis and peri-implantitis. Participants will learn to identify key etiologies, local and systemic risk factors, and clinical signs associated with implant complications. The course covers diagnostic criteria, non-surgical management strategies, and long-term implant maintenance protocols. Emphasis is placed on early detection, risk-based recall intervals, and the use of adjunctive therapies in preserving implant health.

Learning Outcomes:

- Differentiate between peri-implant mucositis and peri-implantitis using current diagnostic criteria.
- Identify etiologic factors contributing to peri-implant disease, including plaque biofilm, occlusal overload, prosthetic design, and implant surface characteristics.
- Assess systemic and local risk factors such as smoking, diabetes, history of periodontitis, and poor oral hygiene.
- Recognize clinical and radiographic signs of early and advanced peri-implant disease.
- Implement appropriate non-surgical interventions, including mechanical debridement and adjunctive therapies.
- Develop individualized implant maintenance plans based on risk assessment, patient compliance, and disease history.
- Educate patients on at-home implant care and maintenance strategies to minimize disease progression.
- Evaluate emerging therapies and technologies in peri-implant disease management.

SIM-ND: MOBILE ANESTHESIA SIMULATION FOR DENTAL SEDATION PROVIDERS (1.5 CE'S)

(Sponsored by: UND School of Medicine) Available Sessions (Max of 4 individuals per session)

8:30–10:00 a.m. | 10:00–11:30 a.m. | 11:30 a.m.–1:00 p.m. | 1:00–2:30 p.m. | 2:30–4:00 p.m.

Course Description:

Since 2013, SIM-ND has been bringing hands-on training to healthcare workers throughout North Dakota, from rural paramedics and firefighters to national guardsmen, medical residents, and physicians. This program, Simulation In Motion - North Dakota (SIM-ND), is a statewide, mobile education system using high fidelity human patient simulators to train pre-hospital and hospital personnel. The program does so using four 44-foot mobile simulation lab trucks that offer two separate simulation spaces and provide versatile and unique learning opportunities. With the help of high-fidelity human simulators, SIM-ND can immerse learners in a safe but realistic learning environment.

What Is It?

SIM-ND delivers mobile, simulation-based moderate / deep sedation and emergency training to dental teams across North Dakota.

Who Should Participate:

General dentists, OMS, sedation assistants, and office emergency teams.

Delivered in SIM-ND Mobile Units:

Simulated operatory & emergency bay, high-fidelity mannequins, airway management tools, video debriefing.

Core Topics:

Sedation safety, complication management, airway rescue, emergency drills, ACLS/BLS reinforcement.

Why It Matters:

✓ Earn CE ✓ Practice real-world emergencies ✓ Reduce risk ✓ Meet ND state board expectations.

Jack Pfister, DDS - Lecture Series

THE ORAL CAVITY UNDER ACID ATTACK...IDENTIFYING, UNDERSTANDING AND TREATING CARIES, EROSION AND OTHER ACID RELATED DISEASES - (3 CE'S)

Presented By: Dr. Marc Geissberger

8:15 a.m. – 11:45 a.m.

Course Description:

As a dentist, personal trainer and fitness nutrition specialist, Dr. Geissberger brings a unique perspective to the subjects of caries, diet and the oral environment. Through this enlightening program, Dr. Geissberger will discuss various disease conditions that plague the entire dental population and identify several at risk populations. The importance of oral pH will be discussed and strategies for altering an unfavorable oral environment will be outlined. Additionally, the dental team will learn progressive strategies to help their patients achieve oral balance and curb their disease processes. Nutrition and diet control will be discussed extensively. At the completion of this program, clinicians will:

Learning Outcomes:

- Understand the difference between a balanced oral environment and one that is susceptible to disease.
 - Develop strategies which can be implemented in practice to help patients achieve oral balance.
 - Develop a program for caries eradication that can be easily implemented into private practice.
 - Develop strategies to begin to discuss the oral implications of poor eating strategies and provide some tips.
 - Learn which materials should be used and how to properly restore dentitions plagued with the effects of erosion, abrasion, GERD and bulimia.
-

MAKING SENSE OF THE WHITENING CRAZE AND BATTLING HIGH CARRIES RATE IN AN UNCONTROLLED ENVIRONMENT? (3 CE'S)

Presented By: Dr. Marc Geissberger

1:15 p.m. – 4:45 p.m.

Course Description:

The Whitening Craze continues. What materials will you advocate for your patients? Should practitioners offer a variety of options to their patients? This program will attempt to make sense of all the products and techniques available in today's marketplace. The lecture will focus on materials and their applications as well as cost analysis of various systems. Laser bleaching, light assisted bleaching, power bleaching, over the counter bleaching, take-home bleaching and other systems will be discussed at length. Strategies on how to increase the whitening component of private practice will be discussed. During this program, practitioners will:

Learning Outcomes:

- Understand the differences between over-the-counter bleaching products and dentist dispensed products.
- Be able to weigh the pros and cons of in-office whitening vs. home whitening.
- Garner a better understanding of the effectiveness of all whitening techniques.
- Learn how to control post operative sensitivity for their whitening patients.
- Develop enhance this component of their practices.
